SUMMARY

Self-taught full-stack and mobile developer who transitioned from Mechanical Engineering (ranked #1 in class) into software through relentless self-study and a rigorous bootcamp. Founder of AllRoutes Logistics, a live last-mile delivery platform built solo from architecture through production deployment — real riders, real payments, real users, 4.2★ on Google. Comfortable moving across stacks: Flutter/Node/TypeScript/React day to day, with Python/Flask used to ship a live, third-party-API-integrated web app end to end.

EXPERIENCE

Founder & Full-Stack Developer — AllRoutes Logistics — Lagos, Nigeria 2024 — Present

- Designed and built a production Flutter app for iOS and Android with real-time order management, live GPS tracking, and push notifications, published on both the App Store and Google Play.
- Built a scalable Node.js/TypeScript REST API handling rider authentication, order lifecycle, payment processing, and Socket.io real-time communication.
- Implemented AWS Rekognition and S3 for ML-powered rider identity verification during onboarding.
- Developed a React/TypeScript admin and customer web platform; managed full DevOps lifecycle including app store publishing, CI/CD via Coolify, and production deployment.
- Grew a live rider network serving real daily orders, maintaining a 4.2★ rating across 38 verified Google reviews.

Freelance Full-Stack Developer — Self-Employed — Lagos, Nigeria 2022 — Present

- Delivered production applications for clients across chat platforms, e-commerce systems, and task management tools.
- Helped early-stage startups ship revenue-generating MVPs from ideation through deployment.

SELECTED PROJECTS

Cloutline — Higher or Lower — Personal Project 2026

- Full-stack Python/Flask web app pulling live pageview data from the Wikimedia REST API in real time on every round; deployed publicly on Railway.
- Built session-based game state management and graceful fallback handling for upstream API failures.

KenaldoAI — Premium Lifestyle Concierge — Personal Project 2026

- AI-powered lifestyle app built with Flutter and Claude AI, featuring Firebase auth and a personalized AI-generated daily feed; live on web and Android.
